Components Included

- **Products**
 - Provides the storage of Product's data with auto assigned product ID for licensing
- **Licensing**
 - Helps in generating License and storage of it's information along with Product ID.
- **Corporate Licensing**
 - useful for activation of software built for business that's to be activated in bulk. A License No along with Key/Password will be generated.
- **Testing Window**
 - This helps in Testing of License Activation, ensuring that the Product and its Licenses are properly configured

Features

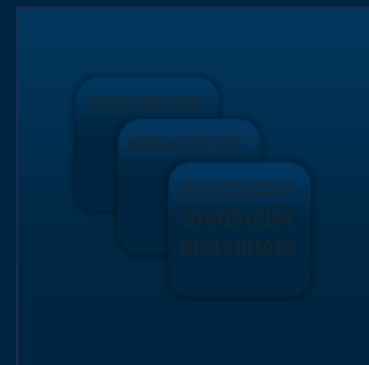

- **Interactive Desktop Like UI**
 - Multitask like a pro with increased productivity with Activagent's Interactive Desktop Like UI features.
- **User Management**
 - Create users based upon administrators, regular users and other users (guest users) and let them access Activagent components
- **Cloud & AI Ready Database Powered**
 - Cloud-hosted and powered by SQL Server 2025 — an AI-ready database, Activagent ensures all the license information remains securely in an isolated environment and can provide rapid insights with the help of AI in SQL Server 2025 to analyse the active and non active licenses, helping in revenue calculation
